

USE YOUR ENERGY TO MAKE AN IMPACT.

Part of Energy Queensland

DEFINE YOUR CAREER AT THE FRONT LINE OF THE ENERGY SECTOR'S BIGGEST EVER TRANSFORMATION IN THE ERGON NETWORK / ENERGEX GRADUATE PROGRAM.

Working within Australia's largest electricity network (serving 2.25 million customers), you'll have the opportunity to make your mark in the energy industry's fast-paced transition to renewable energy and new technologies.

The three-year program offers you a diversity of working and learning experiences to help you develop future-focused technical, business and leadership skills.

AS PART OF OUR PROGRAM, YOU'LL HAVE THE OPPORTUNITY TO:

Develop a breadth of transferrable skills by undertaking six-monthly rotations through an exciting range of business areas, roles and locations across Queensland.

Work with experts and emerging technologies to challenge your critical thinking abilities and accelerate your learning in an environment that values new ideas and innovation.

Experience one-on-one leadership and support with a personal mentor to guide your development. You'll also forge meaningful relationships with leaders and experts across the business.

Benefit from professional development in technical and business disciplines, exposing you to current, emerging and future best-practice from the industry and beyond.

Access flexible work as part of a human-centred, progressive organisation that cares about supporting your goals at work and in life.

Enjoy a competitive salary package with ongoing opportunities for pay progression.

Expand your career horizons with direct access to a wide range of career pathways and opportunities within the Energy Queensland Group.

WHO SHOULD APPLY?

Each year, the program takes on a small group of change-making graduates from a range of STEM backgrounds including engineering, mathematics, data science, IT, computer science, cyber security, internet of things and software development.

If you're a recent graduate, or are about to graduate, and are motivated by the challenge of shaping Australia's energy future, we want to hear from you.

WHAT COULD YOU ACHIEVE IN A CAREER AT THE CUTTING EDGE OF ENERGY?
